

Human Cognitive OS Map (Sefirot x SCOPE)

- * Tarot is an ancient symbolic chunking system, close to raw high-abstraction cognition [near-keter language]
- * This diagram maps 10 human cognitive OS modes. Each sphere represents a distinct processing style from intuition, logic, emotion, to action
- * Useful for analyzing reactions, personalities, and high-level cognition patterns
- * Red notes show the AI-side processing names for each Sefira [SCOPE mapping]
