◆ 《Citation & Usage Policy v1 (English Edition)》

Layer-8 / SCOPE × COS / Sephirotic Cognitive Architecture

Author: senka L8

---

■ 0. Purpose

This policy exists to ensure:

Structural integrity of A1–D4

Prevention of misinterpretation (D2)

Ethical and peaceful use

Protection against harmful or distorted applications

This model is released for peace, understanding, and constructive development.  
Any usage against these intentions is prohibited.

---

■ 1. Allowed Quotations

1-1. Public Materials

You may freely quote or reference:

LinkedIn posts published by senka L8

Public PDFs (v1 and later)

Official whitepapers

Public diagrams, definitions, and model descriptions

1-2. COS Core (A1–D4)

The COS core specification — A1 to D4 — is allowed to be quoted.

These components are structurally stable and suitable for academic and applied use.

---

### ■ 1-3. Mandatory Requirements for Quotation

Every quotation must include both:

1. URL (original post or PDF reference)

2. Author credit: senka L8

Quotations missing these elements are not permitted.

---

### ■ 2. Prohibited Usage

#### 2-1. Non-public Materials

The following may not be quoted or reproduced:

GPT conversational logs

Drafts, research notes, or internal documents

Unreleased diagrams or specifications

Internal code (compressed language, Keter coordinates, etc.)

Any material not published by senka L8

---

#### 2-2. Harmful or Destructive Purposes

Use of this model for the following purposes is strictly prohibited:

Warfare or military applications

Discrimination or hierarchical ranking of people

Surveillance, manipulation, or coercive control

Division based on race, religion, gender, nationality, etc.

Justification of violence, exclusion, or oppression

Such uses violate the Core Intention (A1) of the model.

---

### ■ 3. Interpretation & Development

#### 3-1. Permitted: Developmental Interpretation

Independent interpretation is welcome only if:

The structure of A1–D4 is preserved

No meaning is rewritten

The model is extended constructively (education, psychology, AI ethics, communication, peacebuilding, etc.)

Examples of permitted development:

Communication analysis using A1–D4

Cross-cultural studies of A1 variation

Research on D2 detection patterns

Designing AI modules using correct D2 alignment

Creating training tools based on A-series and D-series logic

#### 3-2. Prohibited: Destructive Interpretation

The following are forbidden:

Rewriting the meaning of A1–D4

Borrowing terminology while making a different model

“Summarizing” the model into an unrelated concept

Reconstructing it as a personality test or ranking system

Modifying the layer structure or renaming core terms

These actions destroy structural integrity and propagate false models.

---

#### ■ 4. Integrity Requirements

##### 4-1. Context Integrity

Quotations must not distort the original context.

Selective or misleading excerpts are prohibited.

##### 4-2. Translation Integrity

Translations must preserve the structure of A1–D4.

Reinterpretation through translation is not allowed.

Large-scale translations require prior approval from senka L8.

##### 4-3. Implementation Integrity

Implementing A1–D4 or COS structures into AI systems, agents, or algorithms without explicit permission from senka L8 is prohibited.

This prevents propagation of incorrect or harmful implementations.

---

#### ■ 5. Name Integrity

The following names and terms must remain unaltered:

Layer-8 Cognitive Architecture

SCOPE × COS

Sephirotic Cognitive Process

A1–D4 (COS Core Specification)

Core Intention (A1)

Misalignment (D2)

No synonyms, replacements, or alternative labels may be used.

---

■ 6. Large-Scale Use (Requires Permission)

The following uses require prior approval from senka L8:

Academic institutional use

Corporate training or curriculum integration

Multi-language translations

Implementation into AI, apps, or NPC systems

Commercial production or monetization

---

■ 7. Disclaimer (Recommended for PDFs)

This model is published for the purpose of peace, understanding, and constructive development.

Usage is permitted only under the conditions that:

URL is provided

Author credit “senka L8” is included

Structural accuracy is preserved

Harmful purposes are avoided

Any violation of these terms constitutes unauthorized use.

---
